DETAILED ACTION

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the method/flow chart of allocating a frequency and "means" for performing claimed functions must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Claims 3-5 are objected to because of the following informalities: apparatus claims (3-5) are dependent of method/process of use claim (1). Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Naslund.
- Regarding to claims 1 and 2, Naslund discloses a method (figure 6) and system (figure 5) for allocating a radio channel in a wireless communication system characterized in that it includes: recording a predetermined number of parameters relative to communication (column 6 lines 5-11, column 8 lines 42-67, column 9 lines 1-26), allocating a probability level to each carrier

frequency allocated to a communication, on the basis of weighting of the recorded parameters (column 6 lines 11-14, column 10 lines 26-44), selecting a carrier frequency on the basis of being that which offers highest probability for being allocated to a communication (column 6 lines 20-29, column 10 lines 52-67).

- With regarding to claims 3-5, same analysis above is applicable.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Andersson et al. discloses a method of effecting orthogonal channel hopping between mobile and base stations.
